Since the product is keyless door lock, a part of door lock may need to be damaged in case of malfunction.

It needs to be familiar with how to use manual closing and opening device in case of emergency.

1. Voltage: DC6V / 2. Be cautious that reverse installation of batteries causes liquid leakage or a burst.
3. When battery is flat, replace all batteries and DO NOT use used batteries with new one.
4. Sensor operation temperature display: 60°C (±10°C)

Product Structure and Name

■ Outdoor body (Types and colors of outdoor body will differ depending on the model.)

Touchpad type A

Touchpad type B

Fingerprint recognition type

- ① Keypad buttons
- ② Card/Key tag input
- ③ External alarm lamp
- ④ Start / End button
- ⑤ Emergency Key Hole
- ⑥ Handle
- ⑦ 9V emergency power supply socket
- ⑧ Reset button
- ⑨ Fingerprint input

■ Indoor body (Types and colors of indoor body will differ depending on the model.)

- ① Battery cover
- ② Input button () : When you register or delete your password, use the card/key tag and the remote controller.
- ③ Open/Close button : Use Open/Close button to open or close the door in the room.
- ④ Manual opening and closing device : Use manual opening/closing device to open the door manually (in case of a fire or other emergencies).
- ⑤ Handle

■ **Basic components** (Check if your product contains all contents.)

1 outdoor body / 1 indoor body / 1 Mortise (latch)
Strike box 1 set / 1 user manual / 1 installation guide
Bolt set / 4 AA batteries (Alkaline)

! **Caution** (Applied model)

※ Remove the protection tape on the touch pad after digital door lock installation

■ **Extra accessories**

Anti-metal card

Small card
(Tag)

Emergency
key

■ **Optional accessory sold separately**

Support plate

Remote controller
(Applied models with remote controller)

※ Basic components (Extra accessories) and its quantity may differ depending on the product model
(Opening/closing function)

※ Types and colors of Card/Remote controller may change.

1. Master Mode

3. Common Features

Door Opening

■ Opening from the outdoor

A. Opening the door using user password from the outdoor

1. Press more than 2 numbers on the number pad. ("Beep" sound occurs and the digit board lights on.)
2. Enter the user password and press "*" button to open a door

※ **Caution** : In case five times errors of the password, the machine does not work for 1 minute.
When the machine has not worked, you should use it in one minute.

B. Opening the door using the Smart card from the outdoor (Applied model)

Contact the registered Smart card to the input part in the outdoor body.
"Ding-dong" sound will occur and the door will be opened.

C. Opening the door using Fingerprint from the outdoor (Applied model)

Place the registered fingerprint on the scanner. ("Beep" sound) & Raise down the handle to open the door

※ Master control password can be used to unlock the door like the same way of user password.

■ Opening from the indoor

※ **MAIN LOCK** : Press "Open/Close button" to open the door or with handle down, you can open the door easily.

Door Closing

■ Closing from the outdoor

- ※ **Auto mode** : Close the door, It will lock automatically.
- ※ **Manual Mode**: Touch more than 2 numbers on the number pad to close the lock.

■ Closing from the indoor

- ※ **Auto mode** : Close the door. It will lock automatically.
- ※ **Manual Mode**: Press "Open/Close button" to lock the door or Press remote button to lock the door.

Useful Function

■ Auto locking function

- Manual Mode : Press "Input button" once → "#" button → "Input button". (short one "beep" sound)
- Auto Mode : Press "Input button" once → "#" button → "Input button". (Long "ding-dong" sound.)
- ※ Setting method is the same. Whenever it repeats this process, it changes from one another.
- ※ If the lock is set in auto mode, it locks automatically when close the door.

■ Auto lock time is changeable up to 2~9 seconds

Press "Input button" → "8" button → desired times ("2"~"9" buttons) → "*" button.

■ Indoor dual lock function

If you set the indoor double locking system with the door locked, the door is not opened even though the password is entered or the key is applied from outside.

- ※ Setting: Press "Open/Close button" for 5 seconds. It sounds "ding-dong-dang" for success.
- ※ Cancellation: Main key → Raise down the handle or Press and hold Open/Close button for more than 5 seconds to disable the function and open a door.

■ Outdoor dual lock function (burglar prevention through a slot)

When the external dual lock is set, the door does not open in spite of pressing "Open/Close button" from the indoor.

-Touch pad type A

- ※ Setting : Press and hold "Start/End" button on outdoor body for more than 5 seconds to enable dual locking function
- ※ Cancellation : Press and hold "Start/End" button on outdoor body → Enter registered password
→ Press "*" or "Start/End" button to disable the function

-Touch pad type B & Fingerprint Lock

- ※ Setting : Press more than 2 buttons on touch keypad of outdoor body → Press and hold "#" button on outdoor body for more than 5 seconds to enable dual locking function
- ※ Cancellation : Press more than 2 buttons on touch keypad of outdoor body → Enter registered password
→ Press "*" button to disable the function

■ Password Exposure-proof function

Before inputting passwords, press random digit buttons without limitation and then input the password, and the password will be concealed.

■ Lock Error Check

When the door is not closed normally, the machine will try to open the door three times and then "Beep" sound will occur to inform you of an error. ※ The bolt err in the external alarm lamp lights on.

■ Sound Control Function (volumn low → high)

Open the battery cover → Press "input button" → "1" and "3" buttons → "*" button → "1" button several times for small sound and "3" button several times for loud sound → "*" button.

■ Fire Sensing Function (Built-in Fire Detection Sensor)

When the thermal detection sensor detects heat ($60^{\circ}\text{C} \pm 10^{\circ}\text{C}$), the door will be automatically opened.

■ Battery Exchange Time

If the built-in battery voltage gets downed, the lamp blinks before 7 days and a saved melody rings. You should replace all of them by new spares.

■ Opening the Door with 9V Spare Battery.

A. Opening the Door with the Password:

1. Contact 9V to the emergency power terminal
2. Press more than 2 numbers to light on number pad
3. Input password and Press "*" button to open the lock.

B. Opening the door with RF card

1. Contact a 9V battery to the emergency power terminal
 2. Contact Smart card to the input part to open the lock
- ※ Make sure that battery is properly contacted with emergency socket when using this function.
(External emergency power supply socket does not have polarity)
 - ※ Location of external emergency power supply socket may differ according to the product model.

■ **Re-set function** (Function to reset program by pressing Reset button in case of temporary error rather than product malfunction.)

※ Press Reset button using a sharp object such as ballpoint pen, toothpick, etc

■ External alarm function (Applied model with external alarm function)

- External '**Pin Err**' lamp flashes when entering invalid password. Enter correct password again.
- '**Low Batt**' lamp flashes, when batteries are going flat. Immediately change all of 4 batteries.
- When '**Dual lock**' lamp flashes, a door will not open even after entering correct password. (Dual locking function is enabled).
- If '**Bolt Err**' lamp flashes, open/close function is not working properly since dead bolt(Latch) of indoor body is stuck in front (Strike).

■ Function to open a door using outside emergency key

The function allows opening a door using emergency key in case of emergency or other particular situations. Pull emergency hole cap to side, insert emergency key to the hole and turn around the key.

- ※ User the function only in case of emergency. Alarm sounds when using emergency key.
- ※ Always take the emergency key with you in case of emergency.

Fault diagnosis and troubleshooting

Symptoms	Troubleshooting
Cannot remember password	- Open a door using card/key tag and register new password (number-dedicated models excluded)
Password input failure (5 attempts)	- All functions are not available for 1 minute after failure of 5th attempt. Wait for 1 minute and set new password or card/key tag.
Door is not automatically locked	- Check if auto locking function is enabled
* button is not working	- If other functions are not working, check if batteries are properly inserted. If batteries are flat, replace them with new batteries.
External button sound is not working and lamp is not flashing	- Check if there is any liquid leakage on battery case or product and if so, wipe out contact area with a dry cloth.

Product specifications

Type		Specification
Basic items	Use password	3 ~ 19 digits
	The number of touch keys (Cards/Key tags) to be registered	Up to 50 (Applied models with touch key and card/key tag)
	The number of remote controller to be registered	Up to 15 (Applied models with remote controller)
	The number of fingerprints to be registered	Up to 200 (Applied models with the input of the fingerprints)
	Thickness of door	40~90mm
Power supply	Power source	6V (AA Size 1.5V Alkaline Battery X 4EA)
	Emergency power source (Do not have polarity)	9V square alkaline battery (Purchase separately)
